MESSRS. HOPKINS and Co. solicit the attention of Architects, Builders, Upholsterers, and the Public generally to their RAPID INTERIOR SELF REGULATING BLINDS, which, dispensing entirely with the centre line, is peculiarly suited to French casements and high windows. OUTSIDE SUN BLINDS ON IMPROVED BALANCE ACTION.

H. and Co. are the sole manufacturers of BARROW'S PATENT METAL GROOVE ACTION, comprised for the easy and noiseless ascension of curtains on Brass or Wood Poles. This action has been much used, and with invariable success for octagon, bow, and other shaped windows. Models constantly on show.

HOPKINS and Co., late James Barrow, Window Blind Manufacturers, Cabinet and Genl. Horse Furnishers, 69, Castle-street, East, Oxford-street, London; and at Birmingham

THOSE SPLENDID FRONTS, known as Lambeth Heads, Westminster-bridge-road, have just been secured with JENNINGS'S SHOP-SHUTTER SHOE and FASTENER; as have also those extensive range of Fronts known as Addiscombe's Warehouses, and being Nos. 70, 71, 72, 73, 74, 75, Westminster-bridge-road. This invention has been before the public about fifteen months, and at the time upwards of 1,000 feet fronts can be referred to. The fronts in New Oxford-street, secured by Jennings's Patent Fasteners look much neater, and are more secure, than those fastened with the Chimney Bar.

They can be had in Brass, by the Trade, at 4s., and in Malleable Iron at 3s., per shutter. The cost, even in Brass, is one-third less than the cost of the Bar and Iron Hasp system.

JENNINGS'S other Patented Inventions, such as the India-Rubber Tube Cock, &c. &c. &c., can be seen or had at the Manufactory, 39, Great Charl-tte-street, Blackfriars-road.

JENNINGS'S PATENT VALVES can now be had of WARNER and SON'S, Broad-steps, Jewin Crescent, they being duly licensed to manufacture and sell the same.

SNOXELL'S PATENT SAFETY REVOLVING WOOD SHUTTERS, Manufactory, 96, REGENT-STREET and 19, CHANCERY-LANE. Patent sealed on the 4th day of February, 1845, for Fourteen Years, for Improvements in Revolving shutters of WOOD and IRON, consisting of 6th Methods of Raising and Lowering Shutters, without Machinery, and Two for Hinging and Shooting the Edges of Wood Laths with Iron.—The Patentee having fitted up many hundreds, will feel pleased in forwarding the Testimonials of Architects, Principals of large Establishments, and others, having them now in use, which fully exemplifies the Patentee in stating they are beyond dispute superior to any other Revolving Shutter for durability, security, and simplicity, without the use of cog-wheel worm and screw gear, or any other complicated machinery employed by other makers.

PATENT CONVEX REVOLVING IRON SHUTTERS, recently manufactured, under license, by the late firm of M. HOWARD and Co., 96, Oxford-street.

HARCOURT QUINCEY, Patentee.

CLARK and Co., Manufacturers, beg to call the attention of Architects, Builders, and others, to the IMPORTANT IMPROVEMENTS in the above Shutters, and inspection invited at their Manufactory, 238, Warping, or at their Agents, 486, New Oxford-street. The great importance of strength and stiffness in the laths of REVOLVING IRON SHUTTERS, in affording increased security, is obvious, and it is only necessary to point out the fact, that the patent convex laths are twelve times stronger than the ordinary flat bar, to insure their general adoption.

CLARK and Co. also invite attention to their greatly improved gearing, for raising and lowering the patent Shutters, which, possessing all the advantages of the endless screw (worm and wheel), can be used by hand to run down, and entirely avoids the necessity of using the rat-tail wheel, and is at once simple and thoroughly effective, and is SAFER and MORE DURABLE than any that yet adopted for that purpose; thus rendering the Patent Revolving Shutters the SAFEST and MOST EFFECTIVE in use. These Shutters are fixed horizontally either above or below the window or door, or vertically, for which position the greatly increased strength of the convex laths renders them peculiarly suitable; and can, as applied to a doorway, may be seen any day after Four o'clock at the Britannia Life Assurance Office, corner of Princes-street, Bank.

CLARK and Co. are the SOLE MANUFACTURERS of REVOLVING SHUTTERS, WITH CONVEX IRON LATHS. Engravings and Prospectuses forwarded on application. IMPROVED DRAWN METALLIC SASH BARS, ASTRIGALS, MOULDINGS, STALL-BOARD PLATES, &c.

Steam Engines always on hand, Sawing and Planing Machinery of every description made to order. Wrought-iron Box, and Cast-iron Girders for broken buildings, &c.—CLARK and Co., Engineers, 238, Wapping, or at 486, New Oxford-street, London.

BUNNETT and CORPE, ENGINEERS, Patentees of REVOLVING IRON AND WOOD SAFETY SHUTTERS, and of ORNAMENTAL METALLIC SASH BARS, MOULDINGS, &c., IN BRASS, COPPER, ZINC, &c.

This Manufactory for the manufacture of MARVIN'S PATENT DIAGONAL GRATINGS, for Areas, Balcony Floors, &c.

The superiority of Bunnett and Corpe's Patent Revolving Iron Shutters is satisfactorily established by their most extensive use, and the fact of their having superseded all others; every improvement suggested by practical skill and experience have been adopted, and the prices greatly reduced, to render them the CHEAPEST, as well as BEST IRON SHUTTERS.

B. and C. have also made great improvements in Revolving Wood Shutters, which are fitted up with proper metallic hinges that cannot rust (without which no shutter can be safe or durable), and are exempt by the patent running gear as for Iron Shutters, or counterbalanced in a new or peculiar way, and are wound up or down with the greatest ease, without the use of objectionable loose lines. A comparison with any others, as to quality and price, is respectfully solicited.

A modification of the above, working vertically, is especially adapted for Bay and Oriel Windows.

The prices of the Patent Metallic Sash Bars, &c. have been revised, and where practical, reduced; Shop Fronts, &c. are completely fitted and fixed in a superior style, either plain or ornamental, and with strong drawn moulded sash-board glass handsomely engraved, also completely glazed with best plate glass.

The Patent Diagonal Wrought Iron Grating will be found a great desideratum for areas of shop fronts, in shop and warehouse floors, and for ladies' or floors as it does not obstruct the light, yet admits of ladies walking over or standing on the same.

IMPROVED BENCH AND FLOORING CRAMPS FOR BUILDERS,

which are greatly superior to anything hitherto introduced.

Manufacturers of Improved Steam Engines, Sawing and other machinery, especially adapted for builders' purposes, which may be seen in operation, daily, at the Works, Deptford, Kent.

Estimates given, and Contracts taken, in town or country. Patterns and every description of work may be obtained, on application at the Office of the Patentees, 38, Lombard-street, London; and at the Works, Deptford, Kent.

ARCHITECTURAL ENRICHMENTS.

BIELEFELD'S IMPROVED PAPIER MACHE, which has been almost universally adopted for architectural decoration, has been patronized by her Majesty, by the Honourable Commissioners of Board of Works, by the highest of the nobility and gentry, and by the most eminent architects of the day. It has been used at the royal palaces, at the present House of Lords, at Dublin Castle, at Drayton Manor, the new Conservative Club House, Grocers' Hall, &c. also at the British Museum and Pantheon Bazaar, where it has been extensively used for some years, and an inspection will sufficiently establish its superiority over every other kind of composition, both for beauty and durability. Designs prepared for the decoration of ceilings, panelling of walls, &c. A volume of ornaments, containing more than 1,000 figures of the most useful ornaments, with a tariff, price £1.—Vellum, 15, Wellington Street North, Strand.

CHEAP AND DURABLE ROOFING.

By Her Majesty's Royal Letters Patent.

F. McNEILL and Co., of Lamb's-buildings, Bunhill-row, London, Manufacturers and ONLY Patentees of THE PATENT ASPHALTED FELT, FOR ROOFING HOUSES, VERANDAHS, SHEDS, &c.

Patronized by

HER MAJESTY'S WOODS AND FORESTS,
HER MAJESTY'S COMMISSIONERS OF CUSTOMS,
HONOURABLE EAST-INDIA COMPANY,
HONOURABLE BOARD OF ORDNANCE,
HER MAJESTY'S ESTATE, ISLE OF WIGHT,
ROYAL BOTANICAL GARDENS, REGENT'S PARK.

And by the most eminent members of the Royal Agricultural Societies of England, Scotland, and Ireland; at whose great national shows it has been exhibited, and OBTAINED THE PRIZE, for being the best and cheapest article for roofing; also used for under slates at the Royal Agricultural Society's Houses, in Hanover-square.

Its advantages are lightness, warmth, durability, and economy. It is impervious to rain, snow, and frost, and a non-conductor of heat and sound. The Felt can be cut to any length, by 35 inches wide. The price is only ONE PENNY PER SQUARE FOOT. Samples, with full directions as to its uses and the manner of applying it, with TESTIMONIALS, some of them of seven years' experience, from Architects, Builders, Noblemen, and Gentlemen, who have extensively used it, sent free to any part of the town or country. A Dry-built Felt, for covering Boilers, &c., is also manufactured, by which a saving of about 33 per cent. in fuel is effected. The TRADE are respectfully requested to send their orders DIRECT to the FACTORY, as the correct means of being supplied with the genuine article, and to prevent being misled in their roofs. They are likewise CAUTIONED AGAINST MISREPRESENTATION, as the only Works in Great Britain where the above roofing is made are F. McNEILL and Co.'s Manufactories, LAMB'S-BUILDINGS, BUNHILL-ROW LONDON.

Roofs covered with the felt to be seen at the Factory, also the new Vice-Chancellor's Courts, the passages and offices leading to Westminster Hall, and other buildings at the New Houses of Parliament.—A Liberal Discount allowed to the Trade.
